PROFILE

Computer Science student focused on game development, with a strong interest in gameplay design, game engines, and software architecture. Curious and motivated, I enjoy learning through hands-on experience on personal and academic projects, both independently and as part of a team.

LANGUAGES

French Native

English B2

German A2

PROGRAMMING LANGUAGES

- Python
- C#
- C
- OCaml
- Java
- C++

EDUCATION

Master's Degree – Humanities & Creatives Industries (Video Games & Management track) – Université Côte d'Azur
9/2025 – Ongoing

- Individual and team-based video game production involving multiple industry roles
- Project management and organizational studies in creative industries

PROJECTS

- **Long-term Project – Game Engine (C++ / SDL)**
Engine architecture, scene management, and implementation of core games systems.
- **University Projects – Team-based Game Development**
Gameplay programming, engine integration, and coordination with other disciplines.
- **Game Engine Experiments (Unity, Godot)**
Gameplay prototyping, state machine systems, and exploration of engine pipelines

Bachelor's Degree in Computer Science – Université Côte d'Azur

- 9/2022 – 7/2025
- Algorithms and programming
 - Databases, systems, and networks
 - Applied mathematics for computer science
 - Individual and team-based software projects

TECHNICAL SKILLS

- 2D / 3D Game Development
- Game Engine Development & Usage (Unity, Unreal Engine, Godot)
- Automata and Formal Languages
- Data Structure and Graphs

SOFT SKILLS

- Teamwork in multidisciplinary environments
- Project management
- Technical Communication
- Autonomy and organization
- Collaborative mindset
- Professional attitude
